

# SmartPA Criteria Proposal

Drug/Drug Class:	Non-Oral Contraceptives Fiscal Edit	
First Implementation Date:	January 25, 2012	
Proposed Date:	December 17, 2020	
Prepared for:	MO HealthNet	
Prepared by:	MO HealthNet/Conduent	
Criteria Status:	□Existing Criteria  ⊠Revision of Existing Criteria  □New Criteria	

#### **Executive Summary**

Purpose: To control expenditures by preventing duplication of non-oral contraceptive products

Why Issue Selected:

Non-oral contraceptive agents include intrauterine devices (hormone-containing and copper-containing), transdermal patches, long-acting intramuscular injections, vaginal rings, and diaphragm devices. These options of birth control are largely safe and effective, with most products offering the patient the convenience of continuous contraception without requiring the use of a daily oral tablet. More than 10% of women who use birth control now chose a non-oral form. Because of the long-acting nature of these products, MO HealthNet has discovered the need to monitor utilization of these claims to prevent duplication of therapy from the various providers involved in the patient's care.

Type of Criteria: ☐ Increased risk of ADE ☐ Preferred Drug List

□ Appropriate Indications □ Fiscal Edit

Data Sources: 
☐ Only Administrative Databases ☐ Databases + Prescriber-Supplied

#### **Setting & Population**

Drug class for review: Non-Oral Contraceptives

Age range: All appropriate MO HealthNet participants

#### **Approval Criteria**

Claim is within approved frequency limitations (see Appendix A)

#### **Denial Criteria**

Therapy will be denied if all approval criteria are not met

# **Disposition of Edit**

Denial: Exception code "0683" (Fiscal Edit)

Rule Type: CE

# **Default Approval Period**

1 year

## **Appendix A**

Brand Name	Generic Name	Frequency Limitation
Annovera Vaginal Ring	Segesterone Acetate/Ethinyl Estradiol	Once every 273 days
Depo-Provera 104 SubQ	Medroxyprogrestrone Acetate Syringe	Once every 67 days
Depo-Provera Syringe	Medroxyprogrestrone Acetate Syringe	Once every 67 days
Depo-Provera Vial	Medroxyprogrestrone Acetate Vial	Once every 67 days
Diaphragm(s)	Coil/Flat Spring/Arc-Spring	Once every 273 days
Femcap Cervical Cap	Cervical Cap	Once every 273 days
Kyleena IUD System	Levonorgestrel	Once every 1,368 days
Liletta IUD System	Levonorgestrel	Once every 1,642 days
Mirena IUD System	Levonorgestrel	Once every 1,368 days
Nexplanon Implant	Etonogestrel	Once every 821 days
Nuvaring Vaginal Ring	Etonogestrel/Ethinyl Estradiol	Once every 22 days
Paragard T IUD	Copper Intra-Uterine Device	Once every 2,737 days
Skyla IUD System	Levonorgestrel	Once every 821 days
Twirla 120-30 mcg/day patch	Levonorgestrel/Ethinyl Estradiol	Once every 22 days
Xulane Patch	Ethinyl Estradiol/Norelgestromin	Once every 22 days
